Maximum amount of debris per property is 10 cubic yards. Piles need to be sorted and stacked correctly...

Stacking Piles for Chipping

- Debris should not be blocking any traffic.
- Cutting and stacking of debris should be done prior to the chipper's arrival. The crew will not wait while you cut.
- When stacking the debris, please place all the stems of trees and brush pointing in the same direction with the cut ends toward the road. This makes the pile easier to pull apart to feed the chipper. Maximum pile height is 5 feet.
- Individual cut pieces must not be thicker than 8" in diameter
- Stack similar sized items together in piles. Please hand-pile items.
